

Quality ID #422 (CBE 2063): Performing Cystoscopy at the Time of Hysterectomy for Pelvic Organ Prolapse to Detect Lower Urinary Tract Injury

2026 COLLECTION TYPE:

MERIT-BASED INCENTIVE PAYMENT SYSTEM (MIPS) MEDICARE PART B CLAIMS

MEASURE TYPE:

Process – High Priority

DESCRIPTION:

Percentage of patients who undergo cystoscopy to evaluate for lower urinary tract injury at the time of hysterectomy for pelvic organ prolapse.

INSTRUCTIONS:

Reporting Frequency:

This measure is to be submitted **each time** a procedure is performed for denominator eligible cases as defined in the denominator criteria.

Intent and Clinician Applicability:

This measure is intended to reflect the quality of services provided for patients who are undergoing a hysterectomy for pelvic organ prolapse. This measure may be submitted by Merit-based Incentive Payment System (MIPS) eligible clinicians who perform the quality actions described in the measure based on the services provided and the measure-specific denominator coding.

Measure Strata and Performance Rates:

This measure contains one strata defined by a single submission criteria.

This measure produces a single performance rate.

Implementation Considerations:

For the purposes of MIPS implementation, this procedure measure is submitted each time a procedure is performed during the performance period.

Telehealth:

NOT TELEHEALTH ELIGIBLE: This measure **is not appropriate for nor applicable to the telehealth setting.**

This measure is procedure based and therefore doesn't allow for the denominator criteria to be conducted via telehealth. It would be appropriate to remove these patients from the denominator eligible patient population. Telehealth eligibility is at the measure level for inclusion within the denominator eligible patient population and based on the measure specification definitions which are independent of changes to coding and/or billing practices.

Measure Submission:

Measure data may be submitted by individual MIPS eligible clinicians using Medicare Part B claims. The listed denominator criteria are used to identify the intended patient population. The numerator quality data codes included in this specification are used to submit the quality actions allowed by the measure on the claim form(s). All measure-specific coding should be submitted on the claim(s) representing the denominator eligible encounter and denominator exclusion(s) (as applicable) or selected numerator option. Denominator exclusions describe a circumstance where the patient should be removed from the denominator. Within Medicare Part B claims submissions, denominator exclusions identify circumstances where the patient should be removed from the performance rate calculation prior to determining which numerator outcome is appropriate. QDCs are available to

describe the denominator exclusion within the Measure Specification and should be submitted on the claim.

DENOMINATOR:

All patients undergoing hysterectomy for pelvic organ prolapse.

Denominator Criteria (Eligible Cases):

All patients, regardless of age

AND

Diagnosis for Pelvic Organ Prolapse (ICD-10-CM): N81.10, N81.11, N81.12, N81.2, N81.3, N81.4, N81.89, N81.9

AND

Patient procedure during the performance period (CPT): 58150, 58152, 58180, 58260, 58262, 58263, 58267, 58270, 58275, 58280, 58290, 58291, 58292, 58294, 58541, 58542, 58543, 58544, 58550, 58552, 58553, 58554, 58570, 58571, 58572, 58573

NUMERATOR:

Patients in whom an intraoperative cystoscopy was performed to evaluate for lower urinary tract injury at the time of hysterectomy for pelvic organ prolapse.

Numerator Quality Data Coding Options:

Intraoperative Cystoscopy Performed

Performance Met: G9606:

Intraoperative cystoscopy performed to evaluate for lower tract injury

OR

**Intraoperative Cystoscopy not Performed,
Documented Medical Reasons**

Denominator Exception: G9607:

Documented medical reasons for not performing intraoperative cystoscopy (e.g., urethral pathology precluding cystoscopy, any patient who has a congenital or acquired absence of the urethra) or in the case of patient death

OR

Intraoperative Cystoscopy not Performed

Performance Not Met: G9608:

Intraoperative cystoscopy not performed to evaluate for lower tract injury

RATIONALE:

Lower urinary tract (bladder and/or ureter(s)) injury is a common complication of prolapse repair surgery, occurring in up to 5% of patients. Delay in detection of lower urinary tract injury has an estimated cost of \$54,000 per injury (Visco et al), with significant morbidity for patients who experience them. Universal cystoscopy may detect up to 97% of all injuries at the time of surgery (Ibeanu et al, 2009), resulting in the prevention of significant morbidity and providing significant cost savings (over \$108 million per year).

There is a gap in the performance of cystoscopy at the time of hysterectomy for pelvic organ prolapse. In a recent study we found that only 84.5% (539/638) of surgeons performed cystoscopy at the time of hysterectomy for pelvic organ prolapse. As many as 97% of high volume surgeons performed a cystoscopy at the time of hysterectomy for pelvic organ prolapse while low volume surgeons performed this procedure only 75 % of the time (p<.001).

CLINICAL RECOMMENDATION STATEMENTS:

It is strongly recommended to perform cystoscopy at the conclusion of any hysterectomy done for an indication that includes uterovaginal prolapse. The cystoscopy must assess for and document at a minimum the integrity of

the bladder as well as patency of the ureters.

Performing Cystoscopy at the Time of Hysterectomy for Pelvic Organ Prolapse to Detect Lower
Urinary Tract Injury**

Disclaimer: Refer to the measure specification for specific coding and instructions to submit this measure.

SAMPLE CALCULATIONS

Data Completeness=

Performance Met (a=40 procedures) + Denominator Exception (b=10 procedures) + Performance Not Met (c=20 procedures) = 70 procedures = 87.50%
Eligible Population / Denominator (d=80 procedures) = 80 procedures

Performance Rate=

Performance Met (a=40 procedures) = 40 procedures = 66.67%
Data Completeness Numerator (70 procedures) - Denominator Exception (b=10 procedures) = 60 procedures

*See the posted measure specification for specific coding and instructions to submit this measure.

**2026 Medicare Part B Claims Flow Narrative for Quality ID #422 (CBE 2063):
Performing Cystoscopy at the Time of Hysterectomy for Pelvic Organ Prolapse to Detect Lower
Urinary Tract Injury**

Disclaimer: Refer to the measure specification for specific coding and instructions to submit this measure.

1. Start with Denominator
2. All patients, regardless of age
3. Check *Diagnosis for Pelvic Organ Prolapse* as listed in *Denominator**:
 - a. If *Diagnosis for Pelvic Organ Prolapse* as listed in *Denominator** equals No, do not include in *Eligible Population/Denominator*. Stop processing.
 - b. If *Diagnosis for Pelvic Organ Prolapse* as listed in *Denominator** equals Yes, proceed to check *Patient procedure during the performance period* as listed in *Denominator**.
4. Check *Patient procedure during the performance period* as listed in *Denominator**:
 - a. If *Patient procedure during the performance period* as listed in *Denominator** equals No, do not include in *Eligible Population/Denominator*. Stop processing.
 - b. If *Patient procedure during the performance period* as listed in *Denominator** equals Yes, include in *Eligible Population/Denominator*.
5. Denominator Population:
 - Denominator Population is all Eligible Procedures in the Denominator. Denominator is represented as Denominator in the Sample Calculation listed at the end of this document. Letter d equals 80 procedures in the Sample Calculation.
6. Start Numerator
7. Check *Intraoperative cystoscopy performed to evaluate for lower tract injury*:
 - a. If *Intraoperative cystoscopy performed to evaluate for lower tract injury* equals Yes, include in *Data Completeness Met and Performance Met*.
 - *Data Completeness Met and Performance Met* letter is represented in the Data Completeness and Performance Rate in the Sample Calculation listed at the end of this document. Letter a equals 40 procedures in the Sample Calculation.
 - b. If *Intraoperative cystoscopy performed to evaluate for lower tract injury* equals No, proceed to check *Documented medical reasons for not performing intraoperative cystoscopy or in the case of patient death*.
8. Check *Documented medical reasons for not performing intraoperative cystoscopy or in the case of patient death*:
 - a. If *Documented medical reasons for not performing intraoperative cystoscopy or in the case of patient death* equals Yes, include in *Data Completeness Met and Denominator Exception*.
 - *Data Completeness Met and Denominator Exception* letter is represented in the Data

Completeness and Performance Rate in the Sample Calculation listed at the end of this document. Letter b equals 10 procedures in the Sample Calculation.

- b. If *Documented medical reasons for not performing intraoperative cystoscopy or in the case of patient death* equals No, proceed to check *Intraoperative cystoscopy not performed to evaluate for lower tract injury*.
9. Check *Intraoperative cystoscopy not performed to evaluate for lower tract injury*:
 - a. If *Intraoperative cystoscopy not performed to evaluate for lower tract injury* equals Yes, include in *Data Completeness Met and Performance Not Met*.
 - *Data Completeness Met and Performance Not Met* letter is represented in the Data Completeness in the Sample Calculation listed at the end of this document. Letter c equals 20 procedures in the Sample Calculation.
 - b. If *Intraoperative cystoscopy not performed to evaluate for lower tract injury* equals No, proceed to check *Data Completeness Not Met*.
10. Check *Data Completeness Not Met*:
 - a. If *Data Completeness Not Met*, the Quality Data Code was not submitted. 10 procedures have been subtracted from the Data Completeness Numerator in the Sample Calculation.

Sample Calculations

Data Completeness equals Performance Met (a equals 40 procedures) plus Denominator Exception (b equals 10 procedures) plus Performance Not Met (c equals 20 procedures) divided by Eligible Population/Denominator (d equals 80 procedures). All equals 70 procedures divided by 80 procedures. All equals 87.50 percent.

Performance Rate equals Performance Met (a equals 40 procedures) divided by Data Completeness Numerator (70 procedures) minus Denominator Exception (b equals 10 procedures). All equals 40 procedures divided by 60 procedures. All equals 66.67 percent.

*See the posted measure specification for specific coding and instructions to submit this measure.
