Purpose: This resource walks through the steps needed for small practices to **report Medicare Part B claims measures** (whether participating as an individual, group, virtual group, subgroup, or Alternative Payment Model (APM) Entity).

A **small practice** is defined as a group that has **15 or fewer clinicians** identified by National Provider Identifier (NPI), billing under the groups Taxpayer Identification Number (TIN).

To see if you have the small practice designation, visit the [QPP Participation Status Tool](#).

Already know what MIPS is? Skip ahead by clicking the links in the Table of Contents.

How to Use This Guide

Table of Contents

Click this icon (on the bottom left of each page) to return to the table of contents. 

Hyperlinks

Hyperlinks to the [Quality Payment Program website](#) and downloadable resources are included throughout the guide to direct the reader to more information and resources.

Please Note: This guide was prepared for informational purposes only and isn't intended to grant rights or impose obligations. The information provided is only intended to be a general summary. It isn't intended to take the place of the written law, including the regulations. We encourage readers to review the specific statutes, regulations, and other interpretive materials for a full and accurate statement of their contents.

Overview

What Is The Merit-based Incentive Payment System?

If you're eligible for MIPS:

- You report measure and activity data for the [quality](#), [improvement activities](#), and [Promoting Interoperability](#) performance categories.
 - Exceptions to these reporting requirements include your [MIPS reporting option](#), [special status](#), [extreme and uncontrollable circumstances](#), or [hardship exception](#). Detailed information for each performance year will be available in the Traditional MIPS Scoring Guide, APP Scoring Guide, and MIPS Value Pathways Implementation Guide. These resources are updated annually and will be posted to the [QPP Resource Library](#).
- We collect and calculate data for the [cost](#) performance category for you, if applicable.
 - Exceptions include your [MIPS reporting option](#), [participation option](#), [extreme and uncontrollable circumstances](#), and whether or not you meet case minimum for any cost measures.

To learn more about MIPS eligibility and participation options:

- Visit the [How MIPS Eligibility is Determined](#) and [Participation Options Overview](#) webpages on the [Quality Payment Program website](#).
- Check your current participation status using the [QPP Participation Status Tool](#).

What Is The Merit-based Incentive Payment System? (Continued)

If you're eligible for MIPS (Continued):

- Your performance across the MIPS performance categories, each with a specific weight, will result in a MIPS final score of 0 to 100 points.
- Your MIPS final score will determine whether you receive a negative, neutral, or positive MIPS payment adjustment.
 - **Positive payment adjustment** for clinicians with a final score **above** the performance threshold (**75 points** in 2026 – 2028 performance years).
 - **Neutral payment adjustment** for clinicians with a final score **equal to** the performance threshold (**75 points** in 2026 – 2028 performance years).
 - **Negative payment adjustment** for clinicians with a final score **below** the performance threshold (**75 points** in 2026 – 2028 performance years).
- Your MIPS payment adjustment is based on your performance during the performance year and applied to payments for your Medicare Part B-covered professional services beginning on January 1 of the payment year.
 - E.g., 2028 is the payment year for the 2026 performance year.

To learn more about MIPS eligibility and participation options:

- Visit the [How MIPS Eligibility is Determined](#) and [Participation Options Overview](#) webpages on the [Quality Payment Program website](#).
- Check your current participation status using the [QPP Participation Status Tool](#).

What is the Merit-based Incentive Payment System (Continued)

There are **3 reporting options available** to MIPS eligible clinicians to meet MIPS reporting requirements:

Traditional MIPS

- The original reporting option for MIPS.
- [Visit the Ways to Report - Traditional MIPS webpage to learn more.](#)

- You select the quality measures and improvement activities that you'll collect and report from all of the quality measures and improvement activities finalized for MIPS.

- You'll report the complete Promoting Interoperability measure set.

- We collect and calculate data for the cost performance category and any applicable administrative claims measures for you.

MIPS Value Pathways (MVPs)

- This reporting option offers clinicians a more meaningful and reduced grouping of measures and activities relevant to a specialty or medical condition.
- [Visit the Ways to Report - MIPS Value Pathways \(MVPs\) webpage to learn more.](#)

- You select an MVP that's applicable to your practice.
- Then you choose from the quality measures and improvement activities available in your selected MVP.
- You'll report a reduced number of quality measures and improvement activities as compared to traditional MIPS.

- You'll report the complete Promoting Interoperability measure set (the same as reported in traditional MIPS).

- We collect and calculate data for the cost performance category and population health measures for you.

APM Performance Pathway (APP)

- A streamlined reporting option for **clinicians who participate in a MIPS Alternative Payment Model (APM)**.
- [Visit the Ways to Report - APM Performance Pathway webpage to learn more.](#)

- You'll report a predetermined set of quality measures. There are 2 quality measure sets available (APP and APP Plus).
- MIPS APM participants currently receive full credit in the improvement activities performance category, though this is evaluated on an annual basis.

- You'll report the complete Promoting Interoperability measure set (the same as reported in traditional MIPS).

- Cost isn't evaluated under the APP.

Performance Category Flexibilities for Small Practices

For the 2026 performance year, we remain committed to identifying flexibilities and options to help clinicians in small practices meaningfully participate and succeed in MIPS. These flexibilities apply to all 3 MIPS reporting options (traditional MIPS, MVPs, and APP) unless otherwise specified.

Quality Performance Category

Small practices will receive:

- 3 points for submitting quality measures without an available benchmark (historical or performance period) – all other clinicians receive zero points.
- 3 points for submitting quality measures that don't meet the case minimum or data completeness requirements – all other clinicians receive zero points.
- 6 bonus points added to the quality performance category score when at least 1 quality measure is submitted (applies to individual, group, virtual group, and APM Entity participation, but not to clinicians or groups who are scored under facility-based scoring).

Reminder: A small practice is defined as a group that has 15 or fewer clinicians identified by National Provider Identifier (NPI), billing under the groups Taxpayer Identification Number (TIN). CMS makes this determination by reviewing claims data.

Small Practices Participation in MIPS

Promoting Interoperability Automatically Reweighted to 0%.

Traditional MIPS and MVP Performance Category Weights in 2026:

Quality

40% | of MIPS Score

Cost

30% | of MIPS Score

Improvement Activities

30% | of MIPS Score

Promoting Interoperability

0% | of MIPS Score

What's New with Medicare Part B Claims Reporting in 2026?

- **6 Medicare Part B claims measures will be subject to the topped-out measure benchmarks policy** for the 2026 performance period. Review [Appendix A](#) for a list of these Medicare Part B claims measures.
- **4 Medicare Part B claims measures received substantive measure changes** from the 2025 measure specifications; however, these measures will have a historical benchmark for 2026.
 - 2 of the 4 Medicare Part B claims measures with substantive measure changes are available in MVPs only (Measure 112 and 113).

Get Started with Claims Measure Reporting in 5 Steps

Overview

Step 1. Check Your Current Eligibility

Enter your NPI in the [Quality Payment Program \(QPP\) Participation Status Tool](#) on the QPP website. This tool will show you your current eligibility and indicate if you're considered a small practice. Practices can also sign in to the [QPP website](#) to review eligibility for all clinicians in the practice.

Virtual groups and APM Entities need to sign in to the [QPP website](#) to see if they have the small practice status that allows them to report Medicare Part B claims measures.

What if I'm...

Eligible

If you're currently eligible and wish to report quality measures through Medicare Part B claims, start reporting now. You can't go back and add performance data to claims you've already submitted.

What if I'm...

Not Eligible

If you're not eligible to participate in MIPS, then you aren't required to participate but may be eligible to opt-in to traditional MIPS.

Did you know?

If your practice has 15 or fewer clinicians billing between October 1, 2025, and September 30, 2026, and has selected Medicare Part B claims measures for reporting, continue to report through Medicare Part B claims even if you don't see the small practice status.

- **We'll update eligibility, including small practice status, in December 2026.** If you're currently identified as a small practice, that won't change when we update eligibility.

Note: If the clinicians in your practice aren't eligible to participate in MIPS as individuals, your practice may be eligible to participate as a group. However, a practice that is eligible to participate in MIPS as a group isn't required to do so. A practice has the option to participate in MIPS as individuals or as a group.

We'll only calculate a group-level quality score from Medicare Part B claims measures if the practice submits data for another performance category as a group (signaling their intent to participate as a group).

Step 2. Understand the Available Resources

The [2026 Medicare Part B Claims Measure Specifications and Supporting Documents zip file \(ZIP, 1KB\)](#) on the [Quality Payment Program Resource Library](#) (and [Explore Measures for Traditional MIPS](#) tool which won't be updated until the end of January 2026) includes the individual measure specifications and 3 supporting documents listed below to help you understand how to report quality measures through claims.

Note: A sample measure description is provided in [Appendix B](#) to help you identify important measure definitions and features.

- 1. 2026 Quality Payment Program (QPP) Measure Specification and Measure Flow Guide for Medicare Part B Claims Measures** – This document defines the common terms included in measure specifications, walks you through a sample measure specification, and reviews how the measure flows (included in each specification) can help you interpret who is included in and excluded from the measure's patient population.
- 2. Medicare Part B Claims Measure Specifications Release Notes** – This document details changes to existing measures that will go into effect in the 2026 performance period.
- 3. 2026 Quality Payment Program (QPP) Medicare Part B Claims Measures Single Source** – This spreadsheet is a tool that can help you identify measures that may apply to your practice based on common codes that you bill.

Step 3. Identify Your Measures

Your quality reporting requirements are determined by your MIPS reporting option.

Traditional MIPS	MVPs	APP/APP Plus
Select a minimum of 6 quality measures (including 1 outcome or high priority measure) from the complete MIPS quality measure inventory. OR Report 1 complete specialty measure set. Did you know? If the specialty set includes fewer than 6 Medicare Part B claims measures, you'll meet reporting requirements if you report all the Medicare Part B claims measures in the specialty set.	Select a minimum of 4 quality measures (including 1 outcome or high priority measure) from your chosen MVP. Did you know? If your selected MVP includes fewer than 4 Medicare Part B claims measures, you'll meet reporting requirements if you report all the Medicare Part B claims measures in the MVP.	No measure selection - Report the 3 measures required by the APP (or the 4 measures required by the APP Plus). You'll also need to register for and administer the Consumer Assessment of Healthcare Providers and Systems (CAHPS) for MIPS Survey measure.

Step 3. Identify Your Measures (Continued)

Not sure how
to get
started for
traditional
MIPS?

In addition to reviewing measure specifications, you can:

- Use the **2026 Quality Payment Program (QPP) Medicare Part B Claims Measures Single Source document** (from [Step 2](#)) to search for available measures based on encounter, procedure, and diagnosis codes that you routinely bill.
- On the [Explore Measures for Traditional MIPS](#) on the Quality Payment Program website, **search for key terms** that are applicable to the care that you provide or patient population you serve or **filter by specialty set**. (Explore Measures for Traditional MIPS won't be updated with 2026 measures and activities until early 2026).

Not sure how
to get
started for
MVPs?

- Use the [Explore MVPs webpage](#) to review detailed measure specifications and other measure information available for each MVP. **(Explore MVPs won't be updated with 2026 MVPs until early 2026).**
- To signal your intent to report Medicare Part B claims through an MVP, MIPS eligible clinicians, groups, subgroups, virtual groups, and APM Entities will be required to submit an identifier and \$0.00 line-item charge, via Medicare Part B claims, that corresponds with the MVP being submitted. Review [Appendix F](#) to determine the appropriate identifier for your MVP.
- **Note:** You'll need to [register for your selected MVP](#) between April 1 and November 30, 2026.

Not sure how
to get
started for
the APP?

- Use the [APM Performance Pathway: Quality Requirements webpage](#) to review more information on the quality performance category reporting requirements for the APP.

Step 4. Establish an Office Workflow

The next step is to set up an office workflow that will let the denominator eligible patients for each of the measures be accurately identified on your Medicare Part B claims.

To do this, make sure that your supporting staff (including billing services):

- Understand the intent of the measures identified for submission.
- Review the specifications for your measures so you can identify all denominator-eligible claims.
- Know how often the measures you're reporting must be submitted on Medicare Part B claims within the performance period. This information can be found within each measure specification.
- If applicable, contact your software billing vendor to verify that the measures can be coded within the office workflow system and updated yearly.
- Review your office workflows annually to determine if all measures your practice is intending to report have appropriate quality data codes (QDC) attached, and if your practice no longer intends to report a measure, you'll need to remove the QDC codes attached to your claims to avoid this measure receiving a score.

Note: Review the sample measure numerator codes in [Appendix C](#) to find where the numerator and denominator codes are located within each measure's specifications.

Step 5. Add Your Quality Measure Performance Data to Your Medicare Part B Claims

To add your quality measure performance data to your Medicare Part B claims, you'll code your claims as usual and add quality data codes and Current Procedural Terminology (CPT) codes as appropriate for the measure being reported.

Append QDC(s): Submit your quality data for MIPS through your Medicare Part B claims by appending a QDC to your claims form with dates of service during the performance period – January 1 through December 31, 2026. QDCs must be included on the originally submitted claim. You can't go back and add QDCs to a previously submitted claim.

TIP: Reporting a multi-performance rate measure?

Verify your office workflow captures the appropriate QDCs on your Medicare Part B claims by reviewing the performance rate used for scoring in the 2026 Multi-Performance Rate file on the [Quality Benchmarks](#) webpage, which will be updated with 2026 benchmarks in late January.

Append the Appropriate MVP Identifier: Submit an identifier that corresponds with the MVP being submitted. This identifier informs CMS of your intent to report an MVP. The identifier is required to be appended on at least one Medicare Part B claim, for the Medicare Part B claims collection type or contained within the data submitted by you or your third party intermediary. To determine the identifier required for the MVP that you plan to submit, please refer to [Appendix E](#). For an example as to how to append the MVP identifier to a claim, please refer to [Appendix D](#).

Insert a Charge: When you attach a QDC or MVP identifier to your claim, you must include \$0.00 line-item charge. If your billing software will not accept a code without a charge, attach a \$0.01 line-item charge for the QDC and the MVP identifier, if applicable. An entry in the line-item charge box on the claim form is a requirement for quality reporting via Medicare Part B claims to CMS.

Step 5. Add Your Quality Measure Performance Data to Your Medicare Part B Claims (Continued)

- **Check for Accuracy:** We encourage you to review your Medicare Part B claims for accuracy prior to submission for reimbursement and reporting purposes. It's important to confirm that you're using the 2026 measure specifications to appropriately code your claims as the specifications may change each year.
 - **Ex: Measure 226 (Tobacco Use: Screening and Cessation Intervention)** has 3 submission criteria that include 3 different patient populations ("denominator") with 3 different sets of performance data ("numerator") outlined in the specification. We use the QDCs you report for submission criteria 1 to evaluate data completeness and case minimum, and the QDCs you report for submission criteria 2 for scoring purposes. **UPDATED:** Review [Appendix G](#) for detailed reporting and scoring examples for Measure 226.
 - Review [the FAQ section](#) to determine what information your MAC will provide regarding the QDCs you submitted.
- **MAC Processing:** Claims (including claims adjustments, re-openings, or appeals) are processed by the [Medicare Administrative Contractors \(MACs\)](#) and must get to the national Medicare claims system data warehouse (National Claims History file) no later than 60 days following the close of the performance period to be analyzed.
- **Don't wait!** For patient encounters that occur towards the end of the performance year (December 31, 2026), be sure to file claims quickly. Medicare Part B claims (with the appropriate QDCs) must be processed no later than 60 days after the close of the performance period to be counted for quality reporting. Please work with your MAC to determine the last day a claim can be submitted for 2026 quality reporting.

Step 5. Add Your Quality Measure Performance Data to Your Medicare Part B Claims (Continued)

Did you know? To meet the 75% data completeness requirement, you should start appending QDCs soon after January 1, 2026. Some measures have a shortened measurement period, so be sure to review measure specifications carefully.

Note: For the 2026 performance period, the data completeness requirement will remain at the 75% threshold and maintained through the 2028 performance period for all available collection types.

Quality data codes must be reported:

On the claim(s) with the denominator billing code(s) that represent(s) the eligible Medicare Part B Physician Fee Schedule (PFS) encounter.

AND

For the same Medicare patient.

AND

For the same date of service (DOS).

AND

By the same clinician who performed the covered service, applying the appropriate encounter codes (ICD-10-CM, CPT Category I, or HCPCS codes). These codes are used to identify the measure's denominator.

Quality measure denominator criteria and numerator codes are subject to change from one performance year to the next. **Make sure you're reviewing the [2026 Medicare Part B Claims Measure Specifications \(ZIP, 1KB\)](#) to ensure you're using the appropriate criteria and codes for the 2026 performance period.**

Make sure you're billing services under the clinician's individual (Type 1) NPI, and not the organization (Type 2) NPI.

We'll only calculate a group-level quality score from Medicare Part B claims measures if the practice submits data for another performance category as a group (signaling their intent to participate as a group).

Frequently Asked Questions

Frequently Asked Questions - Table of Contents

<u>Valid QDCs</u>	<u>24</u>
<u>Remittance Advice</u>	<u>24</u>
<u>Denied Claims</u>	<u>26</u>
<u>Resubmitted Claims</u>	<u>26</u>
<u>Other Performance Categories</u>	<u>26</u>

<u>ICD-10 Changes</u>	<u>27</u>
<u>Critical Access Hospitals</u>	<u>28</u>
<u>MVP Identifier</u>	<u>28</u>

How Do I Know if the QDCs I Submitted Are Valid for MIPS in 2026?

Once you've submitted the claim form and included the QDC(s) and other information to report your quality data via claims, you'll need to review the information you receive back from the MAC in the Remittance Advice (RA) or the Explanation of Benefits (EOB) to see if the data submission was valid and successful.

What Should I Expect to See on My Remittance Advice (RA)/Explanation of Benefits (EOB)?

The RA/EOB lists denial codes that correspond to the information you submitted on the claim form.

When N620 is listed as a denial code, it tells you that the QDC(s) are valid for the 2026 MIPS performance period, but it doesn't mean the QDC(s) were reported correctly for the intended measure, or you met the measure requirements.

- If you bill a \$0.00 QDC line item, you'll get the N620 code. If you bill a \$0.01 QDC line item, you'll get the CO 246 N620 code.
- All of your submitted QDCs on fully processed claims get sent to our warehouse for analysis, so you'll want to be sure you see the QDCs' line items on the RA/EOB and check whether or not you received the RA N620 code. This code confirms the QDCs were received and are valid for the 2026 performance year. It doesn't confirm that the QDCs were reported accurately for the measure.
- See [Appendix E](#) for examples of when a valid QDC was submitted unsuccessfully.

Remember to keep track of all the denominator eligible cases you've reported to prove the QDCs you reported compared to the RA notice you received from your MAC. Each QDC line item will be listed with the N620 denial remark code.

Important

Troubleshooting Tips: If the RA shows only the billed charge and no QDC(s):

- Check to ensure that the billable charge and the QDC(s) were billed on the same claim form for the same date of service at the same time.
- Check to ensure your software is transmitting the QDC(s) with a 0-charge amount or a 1-cent charge for transmission.
- (If applicable) Check with your clearinghouse to ensure it is receiving the QDC(s) and that it is transmitting the QDC(s) to the MAC.
- Check with the MAC to ensure the codes came through on the same claim and to verify how the MAC processed them. You will need the claim number and transmittal batch number in order for the MAC to research the matter.

Note: You can't resubmit a claim solely to add or correct missing QDCs. The submission will be rejected as a duplicate and non-payable claim.

What Should I Expect to See on My Remittance Advice (RA)/Explanation of Benefits (EOB)? (Continued)

Valid QDCs with a \$0.01 Charge Receive a Claim Adjustment Reason Code (CARC).

When you successfully submit a valid QDC, the RA/EOB will list the CARC 246 along with a Group Code (CO or PR) and the Remittance Advice Remark Code (RARC) N620.

- If you bill with a charge of \$0.01 on a QDC item, you'll get CO 246 N620 on the EOB.
- CARC 246 says: **This non-payable code is for required reporting only.**

The CARC and RARC tell you that the QDC you submitted is valid for the 2025 MIPS performance period, but it **doesn't mean the QDC was reported correctly for the intended measure, or you met the measure requirements.**

What's the difference between a RARC & a CARC?

CARCs communicate a reason for a payment adjustment that describes why a claim or service line was paid differently than it was billed.

RARCs are used to provide an additional explanation for an adjustment already described by a CARC or to convey information about remittance processing. When you submit the \$0.01 line-item charge with the QDC, you don't get reimbursed the \$0.01, and as a result, the MAC reduces to \$0.00 when processing your claim and sends a CARC to explain the adjustment.

Valid QDCs with a \$0.00 Charge Receive a RARC code.

When you successfully submit a valid QDC, the RA/EOB will list the RARC code N620 which means that the QDC got to the NCH database.

- If you bill with \$0.00 charge on a QDC line item, you'll get an N620 code on the EOB.
- N620 says: **Alert: This procedure code is for quality reporting/informational purposes only.**

What Happens If a Medicare Part B Claim Is Denied?

If your MAC denies payment for all the billable services on your claim, the QDCs won't be included in the MIPS analysis, and that claim's data won't count towards your quality measure submission for the 2026 performance period.

If you correct a denied claim and it gets paid through an adjustment, re-opening, or the appeals process by the MAC with accurate codes that go with the measure's denominator, then any of the QDCs that apply and go with the numerator should also be included on the corrected claim.

Can I Resubmit a Medicare Part B Claim to Add Quality Data?

No, a claim cannot be resubmitted to the MAC for the sole purpose of adding or correcting a QDC. However, as long as an originally submitted claim contains a QDC for the performance period, eligible clinicians can resubmit that claim to correct or add the line-item charge (e.g., \$0.00 or \$0.01) associated with that QDC.

Can I Use Medicare Part B Claims to Report for Other Performance Categories?

No, but you can sign in to the [QPP website](#) and attest to your Promoting Interoperability measures and improvement activities. We'll use claims to evaluate you on cost measures; no action is needed from you or your practice. If you want to participate as a group, then you will need to report your Promoting Interoperability and improvement activity data at the group level—we won't aggregate individual data into a group score for these categories.

How Does Group, Virtual Group, Subgroup, or APM Entity Participation Work for Medicare Part B Claims Measures?

Unlike other types of quality measures, Medicare Part B claims quality measures are always reported at the individual clinician level. If you're participating as a group, virtual group, subgroup, or APM Entity, then we'll aggregate the individually reported quality measures into a group, virtual group, subgroup, or APM Entity quality score only after you report another performance category at the group, virtual group, subgroup, or APM Entity level.

When Will I See Feedback on My Medicare Part B Claims Reporting?

If you submit quality performance category data via Medicare Part B claims, then you can login to the [QPP website](#) and review your preliminary performance feedback in February 2027.

What About ICD-10 Changes?

Some Medicare Part B claims measures may be significantly impacted by ICD-10 changes, which take effect every year on October 1. These measures will have a 9-month performance period (ending September 30, before the ICD-10 code changes take effect). We'll identify these measures in a fact sheet that will be posted to the [Quality Payment Program Resource Library](#) by October 1 if technically feasible, but no later than the beginning of the data submission period (i.e., January 4, 2027).

Some measures will be impacted by the annual update, but not significantly enough to reduce the performance period. For these measures:

- You should follow the current guidance on ICD-10 coding.
- You don't need to report on any encounters that use new codes (those not included in the current measure specifications).
- You'll continue to report on any encounters that use existing codes (those included in the current measure specifications).

Based on the timing of the change and the availability of data, we would:

- Truncate the performance period to 9 consecutive months if there are 9 consecutive months of accurate, available data.
- Suppress the measure if 9 consecutive months of data aren't available, or revised clinical guidelines, measure specifications and/or codes impact a clinician's ability to submit data on the measure.

What If I'm a Clinician at a Critical Access Hospital?

For the 2026 performance period, if you're a MIPS eligible clinician in a Critical Access Hospital Method II (CAH II) designated as a small practice, then you can participate in MIPS using Medicare Part B claims reporting through the CMS-1450 form. If you're a CAH II clinician, then you'll have to keep adding your NPI to the [CMS-1450](#) form so we can analyze your MIPS reporting at the NPI level.

If you're an institutional provider and you qualify for a waiver from the Administrative Simplification Compliance Act requirement to submit your claims electronically, then you can use the [CMS-1450](#) form to bill a MAC. You can also use this form to bill for institutional charges to most Medicaid State Agencies. You should contact your Medicaid State Agency for more details about how to use this paper form.

What Happens If I Don't Include the MVP Identifier Code?

If you're reporting Medicare Part B claims measures for an MVP and don't report the appropriate MVP identifier on at least one claim, your measures will be attributed to traditional MIPS instead of the MVP. To signal your intent to report an MVP, you must submit an identifier, via Medicare Part B claims, that corresponds with the MVP being reported. The appropriate identifier must be appended on at least one Medicare Part B claim that includes an applicable QDC for one of the quality measures in your selected MVP. You should append an MVP identifier following the same steps as when appending a QDC to a claim.

The MVP identifier only needs to be reported once during the performance period to attribute your quality measures to the MVP.

Any data submitted without the necessary MVP ID will be attributed to traditional MIPS instead of the MVP. (Please note the MVP identifier would also need to be included in any MVP measure and/or activity data submitted to CMS during the submission period that begins January 4, 2027.)

If you submit quality data without the MVP identifier, review the quality performance category under traditional MIPS to determine if your measures are attributing to the incorrect reporting option.

To determine the identifier required for the MVP that you plan to report, please refer to [Appendix F](#). For an example of how to append the MVP identifier to a claim, please refer to [Appendix D](#).

Help and Version History

Where Can You Go for Help?

Contact the Quality Payment Program (QPP) Service Center

by emailing QPP@cms.hhs.gov, creating a [QPP Service Center ticket](#), or calling 1-866-288-8292 (Monday through Friday, 8 a.m. - 8 p.m. ET). Please consider calling during non-peak hours, before 10 a.m. and after 2 p.m. ET.

People who are hearing impaired can dial 711 to be connected to a TRS Communications Assistant.

Visit the [Quality Payment Program website](#) for other [help and support information](#), to learn more about [MIPS](#), and to check out the resources available in the [Quality Payment Program Resource Library](#).

Visit the [Small Practices page](#) of the Quality Payment Program website where you can **sign up for the monthly QPP Small Practices Newsletter** and find resources and information relevant for small practices.

Version History

If we need to update this document, changes will be identified here.

DATE	DESCRIPTION
01/05/2026	Original Posting.
03/10/2026	• Updated Appendix A with information changes to benchmark for Quality ID 141 • Added Appendix G with detailed scoring and reporting information/examples for clinicians reporting Quality ID 226

Appendices

Appendix A: Medicare Part B Claims Measures Subject to the Topped-Out Measure Benchmarks Policy for the 2026 Performance Year

MIPS Quality ID	MIPS Quality Measure Title
*141 – UPDATED	Primary Open-Angle Glaucoma (POAG): Reduction of Intraocular Pressure (IOP) by 20% OR Documentation of a Plan of Care
249	Barrett’s Esophagus
250	Radical Prostatectomy Pathology Reporting
320	Appropriate Follow-Up Interval for Normal Colonoscopy in Average Risk Patients
395	Lung Cancer Reporting (Biopsy/Cytology Specimens)
397	Melanoma Reporting
406	Appropriate Follow-up Imaging for Incidental Thyroid Nodules in Patients

*In the 2026 Medicare Physician Fee Schedule Final Rule, we finalized that Measure 141 would receive the defined topped-out measure benchmark. However, we’ve since determined that the measure doesn’t fully meet topped-out criteria for the 2026 performance period and is therefore eligible to receive a historical benchmark based on 2024 performance.

Appendix B: Medicare Part B Claims Measure Specifications for Denominator Eligible Case

Quality ID #261: Referral for Otologic Evaluation for Patients with Acute or Chronic Dizziness

2026 Collection Type:

MERIT BASED INCENTIVE PAYMENT SYSTEM (MIPS) MEDICARE PART B CLAIMS

MEASURE TYPE:

Process – High Priority

Measure
Description
Location

High-level description of
measure including
patient characteristics

DESCRIPTION:

Percentage of patients aged birth and older referred to a physician (preferably a physician specially trained in disorders of the ear) for an otologic evaluation subsequent to an audiologic evaluation after presenting with acute or chronic dizziness.

INSTRUCTIONS:

Reporting Frequency:

Reporting
Frequency Location

Reporting
Frequency

This measure is to be submitted a minimum of once per performance period for denominator eligible cases as defined in the denominator criteria.

Intent and Clinician Applicability:

This measure is intended to reflect the quality of services provided for patients with acute or chronic dizziness. This measure may be submitted by Merit-based Incentive Payment System (MIPS) eligible clinicians who perform the quality actions as defined by the numerator based on the services provided and the measure-specific denominator coding.

Measure Strata and Performance Rates:

This measure contains one strata defined by a single submission criteria.

This measure produces a single performance rate.

Implementation Considerations:

For the purposes of MIPS implementation, this patient-process measure is submitted a minimum of once per patient for the performance period. The most advantageous quality data code will be used if the measure is submitted more than once.

Appendix B: Medicare Part B Claims Measure Specifications for Denominator Eligible Case (Continued)

Telehealth:

NOT TELEHEALTH ELIGIBLE: This measure is not appropriate for nor applicable to the telehealth setting. Patient encounters for this measure conducted via telehealth should be removed from the denominator eligible patient population. Therefore, if the patient meets all denominator criteria but the encounter is conducted via telehealth, it would be appropriate to remove them from the denominator eligible patient population. Telehealth eligibility is at the measure level for inclusion within the denominator eligible patient population and based on the measure specification definitions which are independent of changes to coding and/or billing practices.

Measure Submission:

Measure data may be submitted by individual MIPS eligible clinicians using Medicare Part B claims. The listed denominator criteria are used to identify the intended patient population. The numerator quality data codes included in this specification are used to submit the quality actions allowed by the measure on the claim form(s). All measure-specific coding should be submitted on the claim(s) representing the denominator eligible encounter and denominator exclusion(s) (as applicable) or selected numerator option. Denominator exclusions describe a circumstance where the patient should be removed from the denominator. Within Medicare Part B claims submissions, denominator exclusions identify circumstances where the patient should be removed from the performance rate calculation prior to determining which numerator outcome is appropriate. QDCs are available to describe the denominator exclusion within the Measure Specification and should be submitted on the claim.

Denominator Criteria (Eligible Cases):

Patients aged birth and older

AND

Diagnosis for Dizziness (ICD-10-CM): H81.10, H81.11, H81.12, H81.13, R42

AND

Patient encounter during the performance period (CPT): 92540, 92541, 92542, 92544, 92545, 92546, 92548, 92550, 92557, 92567, 92568, 92570, 92575

WITHOUT

Encounters conducted via telehealth: M1440

Appendix C: Medicare B Claims Measure Specifications for Numerator Codes (QDCs)

In the snapshot below, a sample Medicare Part B claims measure specification (Quality ID #261) is provided with call-out boxes identifying the 3 quality measure numerator options for the measure (performance met, denominator exception, and performance not met) and the corresponding QDC you would submit on the claim form.

Numerator Quality-Data Coding Options:

Referral for Otologic Evaluation

Performance Met: G8856:

Referral to a physician for an otologic evaluation performed

OR

Referral for Otologic Evaluation Not Performed for Documented Reasons

Denominator Exception: G8857:

Patient is not eligible for the referral for otologic evaluation measure (e.g., patients who are already under the care of a physician for acute or chronic dizziness)

OR

Referral for Otologic Evaluation Not Performed, Reason Not Given

Performance Not Met: G8858:

Referral to a physician for an otologic evaluation not performed, reason not given

*The use of the MVP ID on this claim is for sample purposes only. Quality ID #261 is not included in the Quality Care for Treatment of Ear, Nose and Throat Disorder MVP for the 2026 performance year.

This practice intends to report the MVP, Quality Care for the Treatment of Ear, Nose and Throat Disorders. The MVP ID, M1367, is appended to the claim with a 0.01 line-item charge to signify the intent to report this MVP.*

Appendix D: Sample CMS 1500 Form for Quality Data Submission (Continued)

- The QDC must be submitted with a line-item charge of \$0.00, or (if your system requires it) a line-item charge of \$0.01.
- If transmission of your QDC was successful to your MAC, then you will receive RARC and/or CARC N620, PR 246 N620, or CO 246 N620, depending on the amount of your line-item charge.
- For purposes of this form, a Federal Taxpayer Identification Number (TIN) may be a 9-digit:
 - Social Security number (SSN) formatted like 123-45-6789 used for individuals.
 - Employer Identification Number (EIN) formatted like 12-3456789 used for employers or the self-employed.

IMPORTANT: The CARC and RARC tell you that the QDC(s) you submitted are valid for the 2026 MIPS performance period, but it doesn't mean the QDC was reported correctly for the intended measure or that you met the measure requirements.

Important Reminders for Diagnosis Codes when Submitting Quality Data via Medicare Part B Claims

- Diagnoses should be reported in form locator field (FL) 66-67 a-q on the [CMS-1450](#) claim form. Up to 12 diagnoses can be reported in item 21 on the CMS-1500 paper claim (02/12) and up to 12 diagnoses can be reported in the header on the electronic claim.
 - Only 1 diagnosis can be linked to each line item.
 - The Medicare Part B claims data is analyzed using ALL diagnoses from the base claim (item 21 of the CMS-1500 or electronic equivalent) and service codes for each individual eligible clinician (identified by individual NPI).
 - Eligible clinicians should review ALL diagnosis and encounter codes listed on the claim to make sure they are capturing ALL measures chosen to report that are applicable to the patient's care.
- All diagnoses reported on the base claim will be included in the Medicare Part B claims data analysis, as some measures require reporting more than 1 diagnosis on a claim.
 - For line items containing QDCs, only 1 diagnosis from the base claim should be referenced in the diagnosis pointer field.
 - To report a QDC for a measure that requires reporting of multiple diagnoses, enter the reference number in the diagnosis pointer field that corresponds to 1 of the measure's diagnoses listed on the base claim. Regardless of the reference number in the diagnosis pointer field, all diagnoses on the claim(s) are considered in Medicare Part B claims analysis.

Appendix E: Sample Explanation of Benefits (EOB)

In the snapshot below, a sample EOB outlines 4 examples of incorrect Medicare Part B claims submissions for the Medicare Part B Claims Measure #261: Referral for Otologic Evaluation for Patients with Acute or Chronic Dizziness.

Sample EOB for Medicare Part B Claims Quality Data Reporting											
Billing Provider	123456			Invoice Number							
Service Provider	123456			Check Number	56789						
Tax ID	123456789			Payment Date	11/11/2026

	123-567-9876	10		1	92540	100	75.95	0			
REM	N620			1	G8856	0.01	0	0			
PT RESP	15.19										
CLAIM INFO											

- Example A:** This claim was incorrect because it was processed without a relevant diagnosis code. The appropriate QDC (G-code) and place of service (POS) code were included; the line-item charge is correct; and the procedure/service (CPT) code is present with the QDC. The N620 confirms that the QDC submitted is valid for the 2026 MIPS performance period, but **it doesn't mean the QDC was reported correctly for the intended measure or that you met the measure requirements.**
- Example B:** This claim was processed without the corresponding QDC (G-code). It either wasn't submitted on the original claim or was broken off from the procedure or service code on the claim during processing. The N620 is not present here because there is no QDC to validate.
- Example C:** This claim was processed without the corresponding procedure/service (CPT) code. It either wasn't submitted on the original claim or was broken off from the QDC on the claim during processing. The N620 code is present here because the QDC is valid for 2026, but this claim was not a successful quality data submission for the patient encounter billed.
- Example D:** This claim has an incorrect POS code. The N620 code is present here because the QDC is valid for 2026, but this claim was not a successful quality data submission for the patient encounter billed.

Appendix F: MVP Identifiers for MVPs that Include Medicare Part B Claims Measures

Identifier	MVP Title
G0053	Advancing Rheumatology Patient Care
G0054	Coordinating Stroke Care to Promote Prevention and Cultivate Positive Outcomes
G0055	Advancing Care for Heart Disease
G0058	Improving Care for Lower Extremity Joint Repair
M0001	Advancing Cancer Care
M0002	Optimal Care for Kidney Health
M0004	Quality Care for Patients with Neurological Conditions
M0005	Value in Primary Care
M1366	Focusing on Women's Health
M1367	Quality Care for the Treatment of Ear, Nose, and Throat Disorders
M1368	Prevention and Treatment of Infectious Disorders Including Hepatitis C and HIV
M1369	Quality Care in Mental Health and Substance Use Disorders
M1370	Rehabilitative Support for Musculoskeletal Care

Appendix G: Spotlight on Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention Quality Measure (Quality ID 226)

The QPP Service Center frequently receives inquiries about the **Preventive Care and Screening: Tobacco Use Measure (Quality ID 226)** from small practices who reported the measure via Medicare Part B claims.

This measure has 3 submission criteria, and we've found that practices have requested help understanding which submission criteria are used for measure evaluation, when the measure will count for scoring, and how to report the measure's quality data codes (QDCs) correctly.

How we evaluate the measure for MIPS reporting:

- We evaluate Submission Criteria 1 for data completeness and case minimum.
- We evaluate Submission Criteria 2 for scoring; Submission Criteria 2 is a subset of the population reported for Submission Criteria 1.
- We don't evaluate Submission Criteria 3 for scoring purposes. While encouraged, it isn't required for small practices reporting this measure by Medicare Part B claims, however, it is included in the data publicly reported in [downloadable files on data.cms.gov](https://data.cms.gov). (Submission Criteria 3 is a comprehensive look at overall tobacco screening and cessation intervention.)

For this measure to appear in your performance feedback:

- ✓ You must have a denominator-eligible population for Submission Criteria 2 (at least 1 patient you screened for tobacco use during the measurement period must have been identified as a tobacco user when you reported Submission Criteria 1)
AND
- ✓ You must report at least 1 QDC for Submission Criteria 2.

If none of your patients are smokers, you should look for an alternate measure to report because non-smokers aren't evaluated for performance or scoring in Submission Criteria 2.

Appendix G. Spotlight on Preventive Care and Screening: Tobacco Screening Measure (Quality ID 226) (Continued)

Measure Overview

SUBMISSION CRITERIA 1: ALL PATIENTS WHO WERE SCREENED FOR TOBACCO USE

- **Denominator** = All patients aged 12 or older
- **Numerator** = Patients who were screened for tobacco use at least once within the measurement period

Scoring considerations:

- To meet **case minimum** for this measure, you must have at least 20 patients eligible for the denominator of Submission Criteria 1.
- To meet **data completeness** criteria for this measure, you must report QDCs for at least 75% of the patients eligible for the denominator of Submission Criteria 1.

SUBMISSION CRITERIA 2: ALL PATIENTS WHO WERE IDENTIFIED AS A TOBACCO USER AND WHO RECEIVED TOBACCO CESSATION INTERVENTION

- **Denominator** = All patients aged 12 years and older who were screened for tobacco use during the measurement period and identified as a tobacco user. **You identify this population when reporting Submission Criteria 1.**
- **Numerator** = Patients who received tobacco cessation intervention during the measurement period or in the six months prior to the measurement period.

Scoring considerations:

- To determine **your score** for this measure, we'll compare your performance rate from Submission Criteria 2 (numerator/denominator) to the measure's benchmark (specifically for the Medicare Part B claims collection type).

Appendix G.

Spotlight on Preventive Care and Screening: Tobacco Screening Measure (Quality ID 226) (Continued)

Measure Overview (Continued)

SUBMISSION CRITERIA 3: ALL PATIENTS WHO WERE SCREENED FOR TOBACCO USE AND, IF IDENTIFIED AS A TOBACCO USER RECEIVED TOBACCO CESSATION INTERVENTION, OR IDENTIFIED AS A TOBACCO NON-USER

- **Denominator** = All patients aged 12 years and older
- **Numerator** = Patients who were screened for tobacco use at least once within the measurement period AND who received tobacco cessation intervention during the measurement period or in the six months prior to the measurement period if identified as a tobacco user
 - Submission Criteria 3 is reported with different QDCs than Submission Criteria 1 and 2.
 - QDCs for Submission Criteria 3 must be reported at the same time (on the same claim) as the QDCs for Submission Criteria 1 and 2.

Scoring considerations:

- Not applicable.

Appendix G.

Spotlight on Preventive Care and Screening: Tobacco Screening Measure (Quality ID 226) (Continued)

Detailed Reporting and Scoring Example 1: Complete Measure Reporting.

SUBMISSION CRITERIA 1: ALL PATIENTS WHO WERE SCREENED FOR TOBACCO USE

We determine that you have **100** patients aged 12 or older. (We identify the denominator for you.)

- You report **M1159** for **2** of these patients because they received hospice services during the measurement period.
(Denominator Exclusion.)
- You report **G9902** for **45** of these patients because you screened them for tobacco use and identified them as a tobacco user. (You'll need to report additional QDCs for these patients for Submission Criteria 2 and 3.)
(Performance Met)
- You report **G9903** for **35** of these patients because you screened them for tobacco use and identified them as a tobacco non-user. (You'll need to report an additional QDC for these patients for Submission Criteria 3.)
(Performance Met)
- You report **G9905** for **5** of these patients because you didn't screen them for tobacco. (You'll need to report an additional QDC for these patients for Submission Criteria 3.)
(Performance Not Met)
- You didn't report any QDCs for the other 13 patients.

Scoring:

- You **meet case minimum criteria** because you have more than 20 patients in the denominator (100 patients).
- You **meet data completeness criteria** because you reported performance data for 87 patients (2 + 45 + 35 + 5) out of the 100 patients who met the denominator criteria.

Appendix G.

Spotlight on Preventive Care and Screening: Tobacco Screening Measure (Quality ID 226) (Continued)

Detailed Reporting and Scoring Example 1: Complete Measure Reporting (Continued)

SUBMISSION CRITERIA 2: ALL PATIENTS WHO WERE IDENTIFIED AS A TOBACCO USER AND WHO RECEIVED TOBACCO CESSATION INTERVENTION

We determine that you have **45** patients who qualify for this denominator, based on the QDCs you reported for submission criteria 1.

- You report **G9906** for **42** of these patients because they **received** tobacco cessation intervention during the measurement period or in the six months prior to the measurement period.
(Performance Met)
- You report **G9908** for **1** of these patients because they **didn't receive** tobacco cessation intervention during the measurement period or in the six months prior to the measurement period.
(Performance Not Met)
- You didn't report any QDCs for the other 2 patients.

Scoring:

- You have a **93.33% performance rate** for this measure (42 divided by 45).
- We compare this performance rate to the Medicare Part B claims benchmark for this measure.
- For the 2026 performance year, your performance falls in Decile 2, which means you'll **earn between 2 and 2.9 points**.

B	D	H	J	K	L	M
		Average Performance Rate	Benchmark Type	Decile 1	Decile 2	Decile 3
Measure ID	Collection Type					
226	Medicare Part B Claim	93.7	Historical	8.51 - 79.99	80.00 - 95.64	95.65 - 99.99

Appendix G.

Spotlight on Preventive Care and Screening: Tobacco Screening Measure (Quality ID 226) (Continued)

Detailed Reporting and Scoring Example 1: Complete Measure Reporting (Continued)

SUBMISSION CRITERIA 3: ALL PATIENTS WHO WERE SCREENED FOR TOBACCO USE AND, IF IDENTIFIED AS A TOBACCO USER RECEIVED TOBACCO CESSATION INTERVENTION, OR IDENTIFIED AS A TOBACCO NON-USER

We've already determined that you have **100** patients aged 12 or older. (Same as Submission Criteria 1.)

- You already reported **M1159** for **2** of these patients because they received hospice services during the measurement period.
(Denominator Exclusion accounted for in Submission Criteria 1.)
- You report **G0030** for **42** of these patients because you screened them for tobacco use, identified them as a tobacco user, and they received tobacco cessation intervention. (Note this is the same population you reported G9906 for in Submission Criteria 2, and a subset of the population you reported G9902 for in Submission Criteria 1.)
(Performance Met)
- You report **1036F** for **35** of these patients because you screened them for tobacco use and identified them as a tobacco non-user. (Note this is the same population you reported G9903 for in Submission Criteria 1.)
(Performance Met)
- You report **G0029** for **6** of these patients because you didn't screen them for tobacco or didn't provide tobacco cessation intervention. (Note this is the population you reported G9905 for in Submission Criteria 1 and G9908 for in Submission Criteria 2.)
(Performance Not Met)
- You didn't report any QDCs for the other 15 patients

Scoring: Not applicable

Appendix G.

Spotlight on Preventive Care and Screening: Tobacco Screening Measure (Quality ID 226) (Continued)

Detailed Reporting and Scoring Example 2: No patients for Submission Criteria 2.

SUBMISSION CRITERIA 1: ALL PATIENTS WHO WERE SCREENED FOR TOBACCO USE

We determine that you have **100** patients aged 12 or older. (We identify the denominator for you.)

- You report **M1159** for **2** of these patients because they received hospice services during the measurement period.
(Denominator Exclusion.)
- You report **G9903** for **95** of these patients because you screened them for tobacco use and identified them as a tobacco non-user. (You'll need to report an additional QDC for these patients for Submission Criteria 3.)
(Performance Met)
- You report **G9905** for **3** of these patients because you didn't screen them for tobacco. (You'll need to report an additional QDC for these patients for Submission Criteria 3.)
(Performance Not Met)

Scoring:

- You **meet case minimum** criteria because you have more than 20 patients in the denominator.
- You **meet data completeness criteria** because you reported performance data for all 100 patients who met the denominator criteria.

Appendix G.

Spotlight on Preventive Care and Screening: Tobacco Screening Measure (Quality ID 226) (Continued)

Detailed Reporting and Scoring Example 2: No patients for Submission Criteria 2 (Continued)

SUBMISSION CRITERIA 2: ALL PATIENTS WHO WERE IDENTIFIED AS A TOBACCO USER AND WHO RECEIVED TOBACCO CESSATION INTERVENTION

We determine that you have 0 patients who qualify for this denominator, based on the QDCs you reported for submission criteria 1.

Scoring:

- This measure won't appear in your performance feedback and won't contribute to your final score.
- If you don't have another available and applicable measure to report in its place, you may submit a targeted review. CMS will evaluate whether you're eligible to receive 3 points since the measure couldn't be reliably scored against a benchmark.

SUBMISSION CRITERIA 3: ALL PATIENTS WHO WERE SCREENED FOR TOBACCO USE AND, IF IDENTIFIED AS A TOBACCO USER RECEIVED TOBACCO CESSATION INTERVENTION, OR IDENTIFIED AS A TOBACCO NON-USER

You don't report any QDCs for Submission Criteria 3.

Scoring:

- No impact to your score.
