| PI_PPHI_1  | Security Risk Analysis | Conduct or review a security risk analysis in accordance with the requirements in 45 CFR 164.308(a)(1), including addressing the security (to include encryption) of ePHI data created or maintained by certified electronic health record technology (CEHRT) in accordance with requirements in 45 CFR 164.312(a)(2)(iv) and 45 CFR 164.306(d)(3), implement security updates as necessary, and correct identified security deficiencies as part of the MIPS eligible clinician's risk management process. | Required           | Yes/No Statement         | <p>Security risk analysis of the CEHRT was performed or reviewed prior to the date of attestation on an annual basis and for the CEHRT used during the reporting period.</p> <ul style="list-style-type: none"> <li>If you choose to submit for a 180-day MIPS performance period, it is acceptable for the security risk analysis to be conducted outside the performance period; however, it must be conducted within the calendar year of the MIPS performance period (January 1st – December 31st). An analysis must be done upon installation or upgrade to a new system and a review must be conducted covering each MIPS performance period.</li> </ul> | <p>A dated report or screenshot that documents the procedures performed during the analysis and the results. The report should be dated within the calendar year of the MIPS performance period and should include evidence to support that it was generated for that clinician's system (e.g., identified by National Provider Identifier (NPI), CMS Certification Number (CCN), clinician name, practice name, etc.).</p> <p>Notes:</p> <ul style="list-style-type: none"> <li>The measure requires clinicians to address encryption/security of data stored in CEHRT. At minimum, clinicians should be able to show a plan for correcting or mitigating deficiencies and steps that are being taken to implement that plan.</li> <li>Any documentation of an analysis will suffice; the report does not necessarily need to come from CEHRT.</li> </ul> |

| Measure ID | Measure Name                                                                                    | Measure Description                                                                                                                                                       | Required/<br>Bonus                                                                          | Reporting<br>Requirement  | Validation                                                                                                                                                                                                                                                                                                                                                                                 | Suggested Documentation*                                                                                                                                                                                                                                                                  |

| PI_PPHI_2  | High Priority Practices Guide of the Safety Assurance Factors for EHR Resilience (SAFER) Guides | Conduct an annual assessment of the High Priority Practices Guide SAFER Guide.                                                                                            | Required                                                                                    | Yes/No Statement          | Submit a YES to conducting an annual self-assessment of the High Priority Practices Guide of the SAFER Guides ( <a href="https://www.healthit.gov/topic/safety/safer-guides">https://www.healthit.gov/topic/safety/safer-guides</a> ) for the 2024 performance period.                                                                                                                     | <ul style="list-style-type: none"> <li>• A dated report or screenshot of the self-assessment checklist found on pages 5 – 6 of the Guide.</li> <li>OR</li> <li>• A dated report or screenshot of the recommended practice worksheets (1.1 – 3.3) on pages 9 – 26 of the Guide.</li> </ul> |
| PI_EP_1    | e-Prescribing                                                                                   | At least one permissible prescription written by the MIPS eligible clinician is transmitted electronically using CEHRT.                                                   | Required                                                                                    | Numerator/<br>Denominator | At least one permissible prescription written by the MIPS eligible clinician is transmitted electronically via CEHRT.                                                                                                                                                                                                                                                                      | A dated report or screenshot of patient prescription/record that indicates the number of times where electronic prescribing was performed in accordance with CMS standards for electronic prescribing (45 CFR 423.160(b)).                                                                |
| PI_LVPP_1  | e-Prescribing Exclusion                                                                         | Any MIPS eligible clinician who writes fewer than 100 permissible prescriptions during the performance period.                                                            | Required only if submitting an exclusion for the e-Prescribing measure. Measure ID PI_EP_1. | Yes                       | The exclusion for the e-Prescribing measure: any MIPS eligible clinician who writes fewer than 100 permissible prescriptions during the performance period. In order to submit an exclusion for this measure, MIPS eligible clinicians must select the exclusion for this measure. Any submission of a numerator or denominator for the e-Prescribing measure will void out the exclusion. | A dated report or screenshot from the CEHRT that shows the number of permissible prescriptions written by the MIPS eligible clinician during the performance period.                                                                                                                      |
| PI_EP_2    | Query of Prescription Drug Monitoring Program (PDMP)                                            | For at least one Schedule II opioid or Schedule III or IV drug electronically prescribed using CEHRT during the performance period, the MIPS eligible clinician uses data | Required                                                                                    | Yes/No Statement          | Uses data from CEHRT to conduct a query of a PDMP for prescription drug history prior to electronically prescribing a patient a Schedule II opioid, Schedule III drug or Schedule IV drug using                                                                                                                                                                                            | A dated report or screenshot that shows the MIPS eligible clinician used data from CEHRT to conduct a query of a PDMP for prescription drug history for at least one patient prior to electronically prescribing                                                                          |

| Measure ID   | Measure Name                                                     | Measure Description                                                                                                                                                              | Required/<br>Bonus                                                                                                          | Reporting<br>Requirement | Validation                                                                                                                                                                                                                                                                                                                                                                                                                                         | Suggested Documentation*                                                                                                                                             |
|--------------|------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|              |                                                                  | from CEHRT to conduct a query of a PDMP for prescription drug history.                                                                                                           |                                                                                                                             |                          | CEHRT. The 2020 QPP final rule finalized removing the numerator and denominator previously established and instead requires a "yes/no" response beginning with the 2019 performance period.                                                                                                                                                                                                                                                        | the patient a Schedule II opioid, or Schedule III or IV drug.                                                                                                        |
| PI_EP_2_EX_1 | Query of Prescription Drug Monitoring Program (PDMP) Exclusion 1 | MIPS eligible clinician is unable to electronically prescribe Schedule II opioids and Schedule III and IV drugs in accordance with applicable law during the performance period. | Required only if submitting an exclusion for the Query of Prescription Drug Monitoring Program measure. Measure ID PI_EP_2. | Yes                      | The exclusion for the Query of PDMP measure: any MIPS eligible clinician that is unable to electronically prescribe Schedule II opioids and Schedule III and IV drugs in accordance with applicable law during the performance period. In order to submit an exclusion for this measure, MIPS eligible clinicians must select the exclusion for this measure. The submission of a "yes" for the Query of PDMP measure will void out the exclusion. | A written explanation of eligible clinician type or reference to the law.                                                                                            |
| PI_EP_2_EX_2 | Query of Prescription Drug Monitoring Program (PDMP) Exclusion 2 | MIPS eligible clinician does not electronically prescribe any Schedule II opioids or Schedule III or IV drugs during the performance period.                                     | Required only if submitting an exclusion for the Query of Prescription Drug Monitoring Program measure. Measure ID PI_EP_2. | Yes                      | The 2024 QPP final rule finalized an exclusion for the Query of PDMP measure for any MIPS eligible clinician who does not electronically prescribe any Schedule II opioids or Schedule III or IV drugs during the performance period. In order to submit an exclusion for this measure, MIPS eligible clinicians must select the exclusion for this measure. The submission of a "yes" for the Query of PDMP                                       | A dated report or screenshot from the CEHRT that shows the number of permissible prescriptions written by the MIPS eligible clinician during the performance period. |

| PI_PHCDRR_2_PRE | Syndromic Surveillance Reporting Active Engagement Level 1 | Option 1 – Pre-Production and Validation: The MIPS eligible clinician must first register to submit data with the PHA or, where applicable, the clinical data registry (CDR) to which the information is being submitted. Registration must be completed within 60 days after the start of the performance period, while awaiting an invitation from the PHA or CDR to begin testing and validation. Upon completion of the initial registration, the MIPS eligible clinician must begin the process of testing and validation of the electronic submission of data. The MIPS eligible clinician must respond to requests from the PHA or, where applicable, the CDR within 30 days; failure to respond twice within a performance period would result in the MIPS eligible clinician not meeting the measure. | Required only if reporting the Syndromic Surveillance Reporting Measure (PI_PHCDRR_2) and PI_PHCDRR_2_PROD does not apply. | Yes                      | The 2023 QPP final rule finalized that MIPS eligible clinicians must submit their level of active engagement, either OPTION 1 (Pre-production and Validation) or OPTION 2 (Validated Data Production) for each measure they report beginning with the performance period in CY 2023. | <ul style="list-style-type: none"> <li>• A dated report or screenshot that document successful registration or submission to the registry or public health agency. Should include evidence to support that it was generated for that MIPS eligible clinician's system (e.g., identified by National Provider Identifier (NPI), clinician name, practice name, etc.).</li> <li>OR</li> <li>• Letter or email from registry or public health agency confirming registration or receipt of submitted data, including the date of the submission and name of sending and receiving parties.</li> </ul> |

|                  | Engagement Level 1                                         | where applicable, the clinical data registry (CDR) to which the information is being submitted. Registration must be completed within 60 days after the start of the performance period, while awaiting an invitation from the PHA or CDR to begin testing and validation. Upon completion of the initial registration, the MIPS eligible clinician must begin the process of testing and validation of the electronic submission of data. The MIPS eligible clinician must respond to requests from the PHA or, where applicable, the CDR within 30 days; failure to respond twice within a performance period would result in the MIPS eligible clinician not meeting the measure. | Surveillance Reporting Measure (PI_PHCDR_R_5) and PI_PHCDRR_5_PROD does not apply.        |                          | (Pre-production and Validation) or OPTION 2 (Validated Data Production) for each measure they report beginning with the performance period in CY 2023.                                                                                                                               | evidence to support that it was generated for that MIPS eligible clinician's system (e.g., identified by National Provider Identifier (NPI), clinician name, practice name, etc.).<br>OR<br>• Letter or email from a registry confirming registration or receipt of submitted data, including the date of the submission and name of sending and receiving parties. |
| PI_PHCDRR_5_PROD | Clinical Data Registry Reporting Active Engagement Level 2 | Option 2 – Validated Data Production: The MIPS eligible clinician has completed testing and validation of the electronic submission and is electronically submitting production data to the PHA or CDR.                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Required only if reporting the Syndromic Surveillance Reporting Measure (PI_PHCDR_R_5)and | Yes                      | The 2023 QPP final rule finalized that MIPS eligible clinicians must submit their level of active engagement, either OPTION 1 (Pre-production and Validation) or OPTION 2 (Validated Data Production) for each measure they report beginning with the performance period in CY 2023. | A dated report or screenshot of successful electronic transmissions (e.g., screenshot from another system, etc.). Should include evidence to support that it was generated for that MIPS eligible clinician (e.g., identified by National Provider Identifier (NPI), clinician name, practice name, etc.).                                                          |

| 10/01/2024 | Updated validation criteria for PI_PPHI_2 on page 2 to reflect the 2024 performance year. |
| 01/04/2024 | Original version.                                                                         |

- \* Documentation needs to be from certified electronic health record technology (CEHRT) and be inclusive of:
- 1) The time period the report covers (performance period),
  - 2) Clinician identification, e.g., National Provider Identifier (NPI), and
  - 3) Evidence to support that the report was generated by the CEHRT (e.g., screenshot of the report before it was printed from the system).

Because some CEHRT are unable to generate reports that limit the calculation of measures to a prior time period, CMS suggests that clinicians download and/or print a copy of the report used at the time of data submission for their records.
