

Quality ID #397: Melanoma Reporting
– National Quality Strategy Domain: Communication and Care Coordination
– Meaningful Measure Area: Transfer of Health Information and Interoperability

2021 COLLECTION TYPE:
MEDICARE PART B CLAIMS

MEASURE TYPE:
Process – High Priority

DESCRIPTION:
Pathology reports for primary malignant cutaneous melanoma that include the pT category and a statement on thickness, ulceration and mitotic rate

INSTRUCTIONS:
This measure is to be submitted **each time** a patient's pathology report addresses specimens with a diagnosis of malignant cutaneous melanoma; however, only one quality-data code (QDC) per date of service for a patient is required. This measure may be submitted by Merit-based Incentive Payment System (MIPS) eligible clinicians who perform the quality actions described in the measure based on the services provided and the measure-specific denominator coding.

Measure Submission Type:
Measure data may be submitted by individual MIPS eligible clinicians using Medicare Part B claims. The listed denominator criteria are used to identify the intended patient population. The numerator quality-data codes included in this specification are used to submit the quality actions allowed by the measure on the claim form(s). All measure-specific coding should be submitted on the claim(s) representing the denominator eligible encounter and selected numerator option.

DENOMINATOR:
All melanoma pathology reports for primary malignant cutaneous melanoma

Denominator Criteria (Eligible Cases):

Patients ≥ 18 years of age on date of service

AND

Diagnosis for malignant cutaneous melanoma (ICD-10-CM): C43.0, C43.20, C43.21, C43.22, C43.30, C43.31, C43.39, C43.4, C43.51, C43.52, C43.59, C43.60, C43.61, C43.62, C43.70, C43.71, C43.72, C43.8, C43.9

AND

Patient procedure during performance period (CPT): 88305

NUMERATOR:
Pathology reports for primary malignant cutaneous melanoma that include the pT category and a statement on thickness, ulceration and mitotic rate

Numerator Instruction:

The intent of the measure is to only include pathology reports for primary malignant cutaneous melanoma that may be staged with the following components: pT category and a statement on thickness, ulceration and mitotic rate. Melanoma in situ cases do not meet the criteria for this denominator. In the instance a pathology report meets the denominator criteria, but represents a diagnosis of Melanoma in situ G9430 should be utilized.

Numerator Quality-Data Coding Options:

If Patient is not Eligible for this Measure because the Specimen is not of Cutaneous Origin

Denominator Exclusion: G9430: Specimen site other than anatomic cutaneous location

OR

Pathology Reports that Include the pT Category and a Statement on Thickness, Ulceration and Mitotic Rate

Performance Met: G9428: Pathology report includes the pT Category and a statement on thickness, ulceration and mitotic rate

OR

Pathology Reports that do not Include the pT Category and a Statement on Thickness, Ulceration and Mitotic rate, not Documented for Medical Reasons

Denominator Exception: G9429: Documentation of medical reason(s) for not including pT Category and a statement on thickness, ulceration and mitotic rate (eg, negative skin biopsies in a patient with a history of melanoma or other documented medical reasons)

OR

Pathology Reports that do not Include the pT Category and a Statement on Thickness, Ulceration and Mitotic rate, Reason not given

Performance Not Met: G9431: Pathology report does not include the pT Category and a statement on thickness, ulceration and mitotic rate

RATIONALE:

Research and the publication of new guidelines in 2017 indicate newer tumor characteristics for more precise staging, with implications for treatment outcomes. In 2017, the American Joint Committee on Cancer (AJCC) Melanoma Expert Panel introduced several important changes to the Tumor, Nodes, Metastasis (TNM) classification. The relevant change for this measure in the eighth edition AJCC Cancer Staging Manual include: 1) tumor thickness measurements to be recorded to the nearest 0.1 mm, not 0.01 mm; 2) definitions of T1a and T1b are revised (T1a, <0.8 mm without ulceration; T1b, 0.8-1.0 mm with or without ulceration or <0.8 mm with ulceration), with mitotic rate no longer a T category criterion. (Gershenwald et al.)

The new guidelines state: “As supported by this univariate analysis and previous reports, the mitotic rate is likely an important prognostic determinant when evaluated using its dynamic range across melanomas of all tumor thickness categories. Therefore, the AJCC Melanoma Expert Panel strongly recommends that mitotic rate be assessed and recorded for all primary melanomas, although it is not used for T1 staging in the eighth edition. The mitotic rate will likely be an important parameter for inclusion in the future development of prognostic models applicable to individual patients. Although it is not included in the T1 subcategory criteria, mitotic activity in T1 melanomas also has been associated with an increased risk of SLN metastasis.” (<http://onlinelibrary.wiley.com/doi/10.3322/caac.21409/pdf>)

The 2021 measure has been revised to conform with AJCC requirements and College of American Pathologists (CAP) Cancer Protocol recommendations that went into effect May 2020. (Shon et al).

Gershenwald, J. E., Scolyer, R. A., Hess, K. R., Sondak, V. K., Long, G. V., Ross, M. I., Lazar, A. J., Faries, M. B., Kirkwood, J. M., McArthur, G. A., Haydu, L. E., Eggermont, A. M. M., Flaherty, K. T., Balch, C. M., Thompson, J. F. and for members of the American Joint Committee on Cancer Melanoma Expert Panel and the International Melanoma Database and Discovery Platform (2017), Melanoma staging: Evidence-based changes in the American Joint Committee on Cancer eighth edition cancer staging manual. CA: A Cancer Journal for Clinicians, 67: 472–492

Shon, W., Frishberg, D.P., Gershenwald, J.E., Gill, P., North, J, Prieto, V.G., Scolyer, R.A., Balzer, B.L., Flotte, T.J., McCalmont, T.H., Smoller, B.R. (2019). Protocol for the Examination of Excision Specimens From Patients With Melanoma of the Skin. College of American Pathologists. <https://documents.cap.org/protocols/cp-skin-melanoma-excision-19-4100.pdf>

CLINICAL RECOMMENDATION STATEMENT:

In patients with localized melanoma (Stage I or II), Breslow tumor thickness and ulceration continue to be the most important characteristics of the primary tumor predicting outcome.

SAMPLE CALCULATIONS

Data Completeness=

$$\frac{\text{Denominator Exclusion}(x=0 \text{ procedures}) + \text{Performance Met}(a=40 \text{ procedures}) + \text{Denominator Exception}(b=10 \text{ procedures}) + \text{Performance Not Met}(c=20 \text{ procedures})}{\text{Eligible Population / Denominator } (d=80 \text{ procedures})} = \frac{70 \text{ procedures}}{80 \text{ procedures}} = 87.50\%$$

Performance Rate=

$$\frac{\text{Performance Met } (a=40 \text{ procedures})}{\text{Data Completeness Numerator } (70 \text{ procedures}) - \text{Denominator Exclusion } (x=0 \text{ procedures}) - \text{Denominator Exception } (b=10 \text{ procedures})} = \frac{40 \text{ procedures}}{60 \text{ procedures}} = 66.67\%$$

2021 Medicare Part B Claims Flow Narrative for Quality ID #397: Melanoma Reporting

Disclaimer: Refer to the measure specification for specific coding and instructions to submit this measure.

1. Start with Denominator
2. Check *Patients greater than or equal to 18 years of age on date of service*:
 - a. If *Patients greater than or equal to 18 years of age on date of service* equals No, do not include in *Eligible Population/Denominator*. Stop processing.
 - b. If *Patients greater than or equal to 18 years of age on date of service* equals Yes, proceed to check *Diagnosis for malignant cutaneous melanoma as listed in Denominator**.
3. Check *Diagnosis for malignant cutaneous melanoma as listed in Denominator**:
 - a. If *Diagnosis for malignant cutaneous melanoma as listed in Denominator** equals No, do not include in *Eligible Population/Denominator*. Stop processing.
 - b. If *Diagnosis for malignant cutaneous melanoma as listed in Denominator** equals Yes, proceed to check *Patient procedure during the performance period as listed in Denominator**.
4. Check *Patient procedure during the performance period as listed in Denominator**:
 - a. If *Patient procedure during the performance period as listed in Denominator** equals No, do not include in *Eligible Population/Denominator*. Stop processing.
 - b. If *Patient procedure during the performance period as listed in Denominator** equals Yes, include in *Eligible Population/Denominator*.
5. Denominator Population:
 - Denominator Population is all Eligible Procedures in the Denominator. Denominator is represented as Denominator in the Sample Calculation listed at the end of this document. Letter d equals 80 procedures in the Sample Calculation.
6. Start Numerator
7. Check *Specimen site other than anatomic cutaneous location*:
 - a. If *Specimen site other than anatomic cutaneous location* equals Yes, include in the *Data Completeness Met and Denominator Exclusion*.
 - *Data Completeness Met and Patient Denominator Exclusion* letter is represented in the Data Completeness and Performance Rate in the Sample Calculation listed at the end of this document. Letter x equals 0 procedures in the Sample Calculation.
 - b. If *Specimen site other than anatomic cutaneous location* equals No, proceed to check *Pathology report includes the pT category and a statement on thickness, ulceration and mitotic rate*.
8. Check *Pathology report includes the pT category and a statement on thickness, ulceration and mitotic rate*:
 - a. If *Pathology report includes the pT category and a statement on thickness, ulceration and mitotic rate* equals Yes, include in *Data Completeness Met and Performance Met*.

- *Data Completeness Met and Performance Met* letter is represented in the Data Completeness and Performance Rate in the Sample Calculation listed at the end of this document. Letter a equals 40 procedures in Sample Calculation.
- b. If *Pathology report includes the pT category and a statement on thickness, ulceration and mitotic rate* equals No, proceed to check *Documentation of medical reason(s) for not including pT category and a statement on thickness, ulceration and mitotic rate*.
9. Check *Documentation of medical reason(s) for not including pT category and a statement on thickness, ulceration and mitotic rate*:
 - a. If *Documentation of medical reason(s) for not including pT category and a statement on thickness, ulceration and mitotic rate* equals Yes, include in the *Data Completeness Met and Denominator Exception*.
 - *Data Completeness Met and Denominator Exception* letter is represented in the Data Completeness and Performance Rate in the Sample Calculation listed at the end of this document. Letter b equals 10 procedures in the Sample Calculation.
 - b. If *Documentation of medical reason(s) for not including pT category and a statement on thickness, ulceration and mitotic rate* equals No, proceed to check *Pathology report does not include the pT category and a statement on thickness, ulceration and mitotic rate*.
 10. *Pathology report does not include the pT category and a statement on thickness, ulceration and mitotic rate*:
 - a. If *Pathology report does not include the pT category and a statement on thickness, ulceration and mitotic rate* equals Yes, include in *Data Completeness Met and Performance Not Met*.
 - *Data Completeness Met and Performance Not Met* letter is represented in the Data Completeness in the Sample Calculation listed at the end of this document. Letter c equals 20 procedures in the Sample Calculation.
 - b. If *Pathology report does not include the pT category and a statement on thickness, ulceration and mitotic rate* equals No, proceed to check *Data Completeness Not Met*.
 11. Check *Data Completeness Not Met*:
 - a. If *Data Completeness Not Met*, the Quality Data Code or equivalent was not submitted. 10 procedures have been subtracted from the Data Completeness Numerator in the Sample Calculation.

Sample Calculations

Data Completeness equals Denominator Exclusion (x equals 0 procedures) plus Performance Met (a equals 40 procedures) plus Denominator Exception (b equals 10 procedures) plus Performance Not Met (c equals 20 procedures) divided by Eligible Population / Denominator (d equals 80 procedures). All equals 70 procedures divided by 80 procedures. All equals 87.50 percent.

Performance Rate equals Performance Met (a equals 40 procedures) divided by Data Completeness Numerator (70 procedures) minus Denominator Exclusion (x equals 0 procedures) minus Denominator Exception (b equals 10 procedures). All equals 40 procedures divided by 60 procedures. All equals 66.67 percent.
